

# CORSICA RAID AVENTURE

First Adventure Race in Europe, an dean of the Adventure Race in the World.

## THE ECO-ADVENTURER CHARTER

### NATURE IS UNIQUE...

... It is the other, the one that we can not reproduce as such it is eminently respectable.

- As part of the Corsica Raid Aventure, we like to think through an flawless ethic, multi-activity race of several days can be organized without damage to the most unlikely, the most fragile, the most changing and most unique partner, NATURE.

- If we love our sport so much, is that the word "adventure" is attached, inducing the idea of nature. Beyond the competition itself, the suffering of the body, we demand a difference that lies entirely in the fact that we have the immense privilege of meeting the beautiful, the sublime... nature! After our visit, if it finds its quietude and perfect balance, then we will have lived a great adventure.

- The high idea that we make of our sport is in fact quite justified: multi-activity, long-term effort, race strategy, team spirit, endurance, courage... we have many reasons to passionately love adventure racing.

For the host association of the Corsica Raid Aventure, preservation and management of environmental and natural balances are top priorities. And it is in this spirit that each person accredited by the organization will evolve over the raid.

We must be modest, we are a few privileged persons who play to run, pedal, canyonner in this nature, most often, belongs to no one and therefore to all.

And if you "cross" the road of a wild animal, you will minimize your intrusion into the space used by stopping or making a break to give time for animals to integrate your presence.

- That is why we propose to set up this environmental charter, a charter that does not enumerate a soporific and interminable list of what is prohibited: do not throw his greasy paper, not doing his laundry in the watercourse, do not let run the engines of assistance cars...

Maintaining the existing ecological balance, often wild, and still largely preserved, requires for the participants to the Corsica Raid Aventure a constant attention. For us it is obvious: any racer that would not see this in the depths of his being does not have its place in the Corsica Raid Aventure.

- Therefore, the rule - terrible as it is - is the following: the basic rule is to take and recycle everything we bring in the race. Each participant is obliged to leave no trace of its passage (paper, waste, droppings ...). And to understand the hardness and severity of which our organization can show you during the race, simply think about the environmental damage that can cause human activities in nature if there are no strict rules.

Thus, any participant who would undermine nature directly or indirectly will be immediately punished. The sanction may range from a time penalty to the outright exclusion of the team. Race direction itself have the right to judge the seriousness of the misconduct and to decide the penalty. No exceptions, no claim will be tolerated.

The Corsica Raid Aventure convey values that are the essence of the concept. Inflexibility in the protection of nature is for us an absolute rule.

Obviously this also applies to the organizers and volunteers of the race. Waste sorting and recycling of waste generated during the race are in the heart of the concerns of the association. Sorting bins are provided for the teams and the organization closer to the race on each assistance point .

The fact that we are allowed to cross a multitude of fragile and preserved sites in the heart of the Regional Park, Natura 2000 zone, protected areas, or in one of the World Heritage of Humanity, shows the confidence that the authorities grant to the Corsica Raid Aventure.

Let us strive to be worthy of the privilege given to us and especially what we love: the natural heritage of which we are responsible.

*Welcome to Corsica Island, land of the  
Corsica Raid Aventure !
